

Vasectomy service

Vasectomy is a quick, safe, and effective method of male sterilisation. Sterilisation is a permanent method of contraception, suitable for people who are sure they never want children or do not want more children.

If you feel that a vasectomy is the right thing for you, you can ask your GP to refer you to us or you can self-refer.

Before choosing a vasectomy, you must be certain it is right for you. You should only proceed if you are certain, you do not wish to have any or any more children.

To self-refer please go to our website or scan the QR code
